

Brightly TheWorxHub™ for Healthcare

## How does it work?

TheWorxHub is a cloud-based, all-in-one solution that allows healthcare operations managers to simplify their daily work, become proactively compliant and predict the future. Unlike other healthcare CMMS solutions, TheWorxHub is an interconnected healthcare suite that efficiently manages everything that an operational team encounters, including work orders, assets, compliance tasks, preventive maintenance, inventory and security rounds.

### Simplify your daily work

with anytime, anywhere access to the information and tools your team needs to work at their computer or in the field. Seamlessly connect work, assets, departments and projects within one system to streamline communication.

### Oversee operations

with dashboards, reporting & benchmarking to give clarity on what's happening (or not happening) and help plan and identify challenges before they become a problem (e.g. SLA failures, missed compliance work, budgetary challenges).

### Become proactively compliant

with simple tools for risk assessments, preventive maintenance workflows and compliance code tracking.

### Predict the future

and see the current state of your operations to develop a future plan. Drive decision-making and enable communication with configurable data analysis and built-in reports from a central dashboard.

As we've started to utilize TheWorxHub, we're seeing that it really is tailored toward hospitals. After using it, you can see how it really helps to keep you organized and on track to be compliant.
