

Brightly Confirm™

Meeting the growing demands of cemetery management

Do you want to enhance your operational efficiency while eliminating the need for multiple systems and the ever-growing manual paperwork.

Brightly Confirm is an end-to-end asset management system that gives you the full ability to manage multiple cemetery sites through a single platform, giving you a central source of truth for all cemetery and related data. Manage your plots, burial and memorial information, staffing, and much more, giving you more streamlined processes to simplify growing funeral workloads and enhance productivity, allowing you to provide the personal service your customers require.

Key Benefits

A central source of truth for all cemetery and memorial data

Easily centralise and view all live data of cemetery sites, burial plots, memorials, photos, and legal documents.

Greater operational efficiency with streamlined processes

Remove disjointed manual tasks and paperwork with streamlined processes, allowing you to deliver better customer service.

Maximize cemetery operations

Instant access to real time data to make actionable decisions on cemetery operations. Report and optimise operations with the ability to visualise your data.

Key Features

All records and inventory

Record any information against any asset on a single, dependable platform. Link documents through a cross functional collaborative approach.

Digital mapping

Identify cemetery sites, burial plots, and memorials all on a web-based map view for easy location.

Memorial inspections and maintenance

Conduct condition and asset surveys in the form of memorial risk-based inspections and scheduled maintenance on any identified defects.
