

Brightly TheWorxHub

Compliance Pro for Brightly's The Worx Hub

Simplifying and digitizing compliance readiness while eliminating outdated and disparate permitting processes.

Despite advances in today's CMMS solutions, many still lack integration between critical maintenance and compliance activities, leaving permits like ICRA, PCRA, ILSM, and ALSM scattered across spreadsheets, online portals, or even paper. This inefficiency forces technicians to waste time chasing approvals and complicates survey readiness, increasing the risk of errors, jeopardizing hospital accreditation, and putting patient safety at risk.

Compliance Pro from TheWorxHub transforms hospital work orders by digitizing key compliance activities required by The Joint Commission and DNV—such as permitting and compliance binders—and seamlessly integrating them into the work order system. By streamlining compliance and reducing administrative burdens, Compliance Pro helps facility teams cut costs, minimize risk, and maintain accreditation with ease.

Reduce inspection risks

Easily reduce the number of systems and amount of paper by creating one, organizational compliance tool for your team, helping technicians prioritize critical repairs and maintenance.

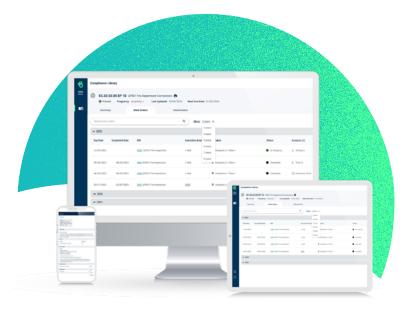

Eliminate separate permitting systems

Easily create permits - such as ICRA, PCRA, ILSM, and ALSM - directly in the work order, allowing for real-time monitoring, full visibility of workflows, and expedited approvals.

Protect hospital accreditation from staff turnover

Easily centralize and standardize all critical compliance documentation – current and historical – into one electronic location, protecting the hospital from outdated or missing information.

Brightly by the numbers

2,000+
healthcare clients

1.4+ billion work orders

4.5 stars out of 5 for "ease of use"

Built for simplicity and maximum efficiency, Compliance Pro from TheWorxHub powers up your work orders with direct permit integration, as well as compliance documentation based on accreditation standards.

Built-in permitting capability

Compliance Pro from TheWorxHub is the only solution to offer a permitting suite - including ICRA, PCRA, and ILSM - that directly integrates into a work order.

"Smart Documentation" protection

Unlike other healthcare CMMS solutions today, Compliance Pro creates "smart documentation", such as dashboards, reports, and insights, to help teams visualize potentially critically missing audit documentation early – allowing them to focus on resolving deficiencies before it's too late.

Minimal downtime

Combining familiar permitting forms, easy-to-use UI, and minimal inputs needed for a work order with our best-in-class implementation and services, Compliance Pro ensures your teams will be up and running quickly, with little to no downtime.

About Brightly Software

Brightly Software, a Siemens company, enables organizations to manage the entire lifecycle of their assets, facilities and infrastructure. As the global leader in intelligent asset management solutions for more than 25 years, Brightly's sophisticated cloud-based platform is expertly designed to improve capital planning through smarter, data-driven decision making, empower technicians to predict, prioritize and manage preventative maintenance activities, and support organizations to achieve sustainability, compliance and efficiency goals. Combined with award-winning training, legendary support and managed services, more than 12,000 clients worldwide depend on Brightly to optimize their teams, operations and strategic planning initiatives.
